HP Proactive Insights

In New Zealand, only **67%**¹ of employees are engaged, ranking below **60%**¹ globally. However, with supportive technology, job engagement increases by **230%**².

In today's modern workplace, the interaction between employees and their devices and applications is crucial. But how can your IT teams ensure a seamless hybrid workplace experience without insight into every employee device?

Introducing HP Proactive Insights: the solution to spot device issues before they happen and optimise the employee device experience.

Key Features

- 1 Proactive Issue Resolution** Address device and application issues before they cause disruptions, reducing the volume of help desk tickets and minimising IT involvement.
- 2 Comprehensive Device Management** Monitor and manage multi-vendor, multi-OS devices with ease using preconfigured, customisable dashboards.
- 3 Automatic Remediation** HP devices offer automatic BIOS management and updates, reducing the load on your IT staff and ensuring seamless device performance.
- 4 Enhanced Employee Feedback** Built-in feedback lets employees share sentiment and feedback on their devices, ensuring continuous improvement.
- 5 Windows 11 Readiness Assessment** Get ready for Windows 11 transition with fleet-wide intelligence and migration recommendations.

Benefits

- 1 Improved Productivity** Proactively identify and address device issues, minimising disruptions and maximising employee productivity.
- 2 Streamlined Device Management** Simplify asset inventory, device health, and performance management across your organisation.
- 3 Enhanced Employee Satisfaction** Gather insights from telemetry, automation, and employee surveys to improve end-user satisfaction levels.
- 4 Seamless Transition to Windows 11** Ensure a smooth migration to Windows 11 with comprehensive readiness assessments and recommended actions.
